BIOSOL Na6**MINERAL DEPOSITS****TECHNICAL DATA**

Tired of having to use multiple corrosive cleaning products to remove the constant buildup of mineral and scale deposits? Looking for a safer alternative that won't leave your skin burning, much less the environment. Then the environmentally friendly – safe BioSol NA6 mineral and scale deposits remover and degreaser is the product for you. Safe and efficient BioSol NA6 will remove the toughest calcium and lime deposits from heat exchangers, piping, pumps, valves, swimming pools, stills, vacuum pumps, cooling systems, air compressors, rinse tanks, refrigeration units, and humidifiers. Containing cleaning agents that serve to boost the overall power. BioSol NA⁶ is an easy to use product with no special handling.

Traditional methods of removing mineral deposits and scale deposits often require the use of harmful acids such as hydrochloric, phosphoric, sulfuric, glycolic, sulphuric, formic or citric – powerful yet corrosive substances. BioSol NA6 is equally as powerful yet non-hazardous and environmentally safe alternative. A unique blend of low pH organic salts and environmentally friendly solvents and surfactants, BioSol NA6 emulsifies light oil products and dissolves mineral product buildups. A phosphate free, non-fuming, non-flammable and user friendly product, BioSol NA6 is non-corrosive to skin and metal.

Performance features & Benefits:**Minimal Product, Maximum Results:**

- Non-corrosive cleaning agent that won't burn skin, reducing insurance claims
- Easy to use and highly efficient
- Multipurpose product that eliminates the use of degreaser and descaler
- Environmentally safe
- Contains no carcinogens, phosphates or caustic materials
- Rinses with water leaving surfaces paint ready
- A versatile product well suited for many applications
